How To Use This Book

Follow the fish!

1. The exercises in this book are not to be worked straight through (p. 5 – 126) but to be used in the sequence of its companion book, *Angling for Words Study Book*.

Ex. The first group of exercises pertain to the (f) (l) (s) rule (which is presented early in Level I); however, p. 7 should not be used until ph has been introduced in Level III.

2. The fish  at the top of each page refers to the proper place of the exercise in the letter presentation order.
3. It is recommended that each student keep a loose-leaf notebook in which to organize his written work. See suggestions in *Angling for Words Study Book*.
4. All exercises pertaining to one concept should not be completed in one lesson. When a page involves many answers, it is beneficial to assign only one or two columns at a time, saving the others for the ever-continuing review.
5. Only a few exercises are included for prefixes and for each suffix, plural, ie - ei, and possessive rule. More practice must be afforded in dictations and in other workbooks. Exceptions to each rule must not be presented until the rule is thoroughly understood and automatic.
